Dashboard:

The screenshot shows the IBM Cloud dashboard interface. At the top, there's a navigation bar with the IBM Cloud logo, a search bar, and links for Catalog, Manage, and the user's account (Nehru Prasanth's Acco...). Below this, the main dashboard area is titled "Dashboard" and includes options to "Edit dashboard" and "Upgrade account".

The dashboard is divided into several sections:

- For you:** A row of five cards with icons and titles: "Build" (Explore IBM Cloud with this selection of easy starter tutorials and services.), "Build a web app with Watson Speech to Text" (Deploy a conversational interface compatible with any application, device, or channel.), "Get Started with Watson Studio" (Get started with using AI and Cloud Object Storage in 15 minutes.), "Build a Virtual Private Cloud (VPC)" (Upgrade to a paid account to create your own protected space in the IBM Cloud.), and "Build a virtual machine" (Lift and shift your VMware workloads to the IBM Cloud.). Each card has a "Getting started" button and a duration (15 min, 2 hr, 7 min, 7 min).
- News:** A section with the title "News" and a "View all" link. It lists three news items: "SLSA Support in IBM Cloud Continuous Delivery", "WebSphere Application Server Support Restatement", and "IBM Adds Lifecycle Services to Enterprise Networking and Deepens Strategic Partnership with Cisco".
- Recent support cases:** A section with the title "Recent support cases" and a "View all" link.
- Planned maintenance:** A section with the title "Planned maintenance" and a "View all" link.
- IBM Cloud status:** A section with the title "IBM Cloud status" and a "View all" link. It features a large, stylized "IBM" logo made of dots.

On the right side, there's a user profile section for "Nehru Prasanth" with a "Profile" link, "Log in to CLI and API", "Privacy", "Change theme", and a "Log out" button. Below this, there's a snippet of text: "easily find, prepare, understand and use the data they need through an enterprise data catalog & governance platform."

The bottom of the dashboard shows a Windows taskbar with the date and time (11:17 PM, 11/15/2022) and system status (24°C, Mostly clear).
